GreaseWatch 4 WIRELESS ALARM

PRODUCT FEATURES & TECHNICAL SPECIFICATION

Design and Dimensional Data (inches and [mm]) are Subject to Manufacturing Tolerances and Change Without Notice

Savings:

- Monitor provides real time data about grease and oil level sludge level, liquid level, and even temperature inside the interceptor.
- Audio and visual alarm signals when it is time to pump enabling on demand pumping.
- Eliminate the back breaking task of lifting cast iron covers to see inside of the interceptor.
- Control panel can be mounted in facility manager's office or work area.
- Long life lithium battery keeps system up and running.
- Transmits data via radio frequency.

Safety:

- Data can be shown to regulators on the control panel for total peace of mind compliance.
- End to end data encryption.

Stewardship:

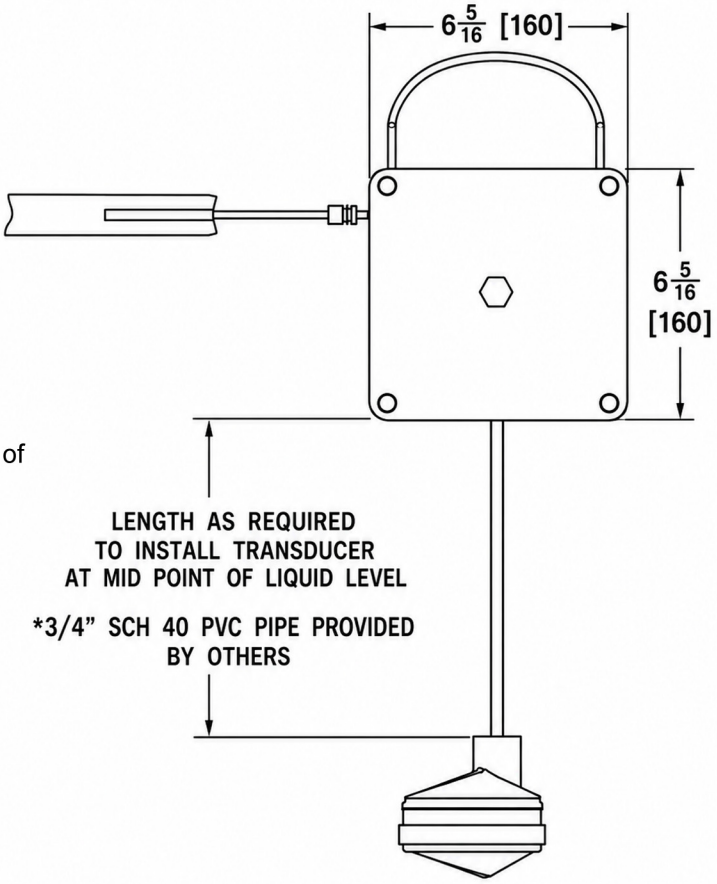

- Accurate grease interceptor maintenance helps avoid catastrophic backups.

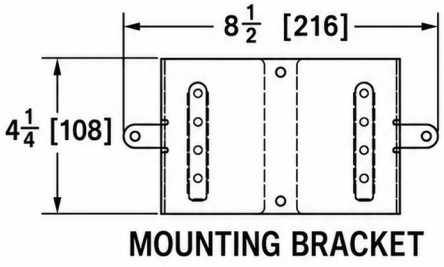

Style:

- Sensor mounts inside interceptor and communicates wirelessly (900 Mhz radio) to control panel plugged inside of building.
- Can be retrofit to most interceptor systems.
- Control panel can be connected to a Building Automation System for remote alarm notification.
