

Many food service facilities have to deal with unsightly grease that spills around their dumpster and cleaning it up is very difficult. **Most people try to pressure wash grease down their sewers. However, this is no longer an options since the EPA considers grease a pollutant.** That's why it is more important than ever to keep your grease dumpster clean.

## The Pavement Protection System

- Dimensions: 55" x 96"
- Installs directly under your dumpster to catch and contain grease spills
- It can hold 5 gallons of petroleum and fat based liquid (like grease!)
- When fully saturated, place in disposal bag and replace filter
- Uses unquely designed 3 stage mat that is UV stable so it won't degrade even in the harshest weather
- Designed to absorb grease while repelling water
- Plastic sheeting on bottom of pad contains grease and dispenses it around the entire pad to keep it from puddling
- Increases the life of your pavement, saving you from costly asphalt repairs
- Can help to reduce rodents and pests
- Eliminates ugly stains, foul odors, and slip & fall liabilities in your parking lot
- Simple and economical to service
- Made in the USA with United Laboratories approved materials
- Helps you comply with environmental regulations and EPA clean water mandates which can result in 10 to 15 thousand dollar fines (per reg. 16743 EPA).

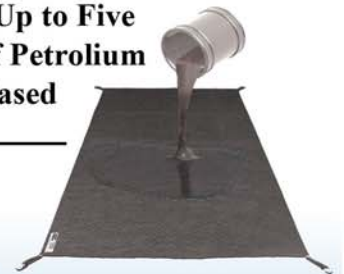

- **Durable UV Stable Top Layer**
- **Hydrophobic Absorbent Center**
- **5ml. Tear Resistant polymer Backing**

- **Military Grade Elastic Support Bands**
- **Powder Coated, Low Profile, Surface Mounting Cleats for an Easy install**

**Contains Up to Five Gallons of Petroleum and Fat Based Liquids**

## What's Included?

- (1) Hydrophobic absorbent mat
- (4) Steel hold down cleats
- (4) Cleat pavement fasteners
- (4) Cleat shims
- (1) Disposal bag
- 1/3" Drill Bit
